

THE MUST OF FOLDABLE DINGHIES

Equipped with the Acti-V hull, (patented from the Zodiac Nautic technology knowledge), the bow of Cadet Fastroller is thinner and more Pronounced, and its h2p floor more rigid ; result: its setting up by simple inflation, an expert steering and a frank and precise heading never reached for this size of annex. Each of its structural elements is welded, including his defense, its transom, or the background fabric. The insiders will appreciate its technical Prowess and the direct impact on the safety and durability of the Product.
